

Agenda 11/14/13

Victor Pontis, David Sessoms, Sashko Stubailo, Santhosh Narayan

Agenda

- Discuss Team Plan
 - Quality
 - What needs to be altered or improved
- Design Doc
 - Quality
 - What needs to be updated for final version
 - What components of original plan are still necessary
 - Discuss changes from original plans presented last week
- Developing protocol
- MVP Decisions
 - postponed groups (not a necessary feature for mvp)
- Rating Algorithm Idea
 - Simple Elo of ratings averaged
 - calculate results, and keep team member rating ratios constant
- Model Question

Meeting Minutes

- Data Model
 - Like to see full data model for MVP
 - Shouldn't change arrows, just add
- Key Goals and Purpose
 - Add actionables for the goals
- Concept Model
 - Good
- Game vs. Game outcome
 - May want to add more than outcomes, so will keep for now
- Rules
 - Just so that people can see the rules, way to resolve disputes
 - Move from concept to feature
 - Attribute of Group
- Group
 - Decided not to do in the MVP
 - No access control in MVP
 - Everything Globally available in MVP
- Feature Description
 - Good Scope for Final Project
 - Comprehensive

- Security
 - Rails handles a lot
 - Username is the only input field in the entire website
 - scripting vector issue
 - Flesh out security requirements
 - should be closer to: **only** users of a group can see X
 - User A can see the score of User B **if and only if** _____
 - Who can report wins/losses
 - Threat Model
 - an adversary is capable of creating urls
 - need to make access controls to prevent against it
 - explicitly state what we are guarding against
 - Mitigations
 - Fine with them
- UI
 - How to show to get to any page
 - Include comment about a Nav bar
 - Same with profile page
 - turn anypage from a box to a dotted box or cloud? make it clear that its not an actual page
- Wireframes
 - look good
- Design Challenge
 - generally looks good
 - Change partition to tag
 - only complaint: pros and cons mostly deal with implementation, ease, and difficulty pros and cons. would like to see pros and cons that deal with purpose

Team Plan

- Stakeholders
 - looks good
- Resources
 - good
 - decide what we mean by want it to be usable - maintain is a big word
 - the answer can be that it is a project
- Tasks look great
- Github issues
 - lotsa emails :)
 - already doing pull requests and separate branches
- Risks
 - ?
- love the logo :D
